

INFINITI.

**GENUINE PARTS**

**INSTALLATION INSTRUCTIONS**

**DESCRIPTION:** Wi-Fi Router Kit, Infiniti, QX60

**APPLICATION:** QX60

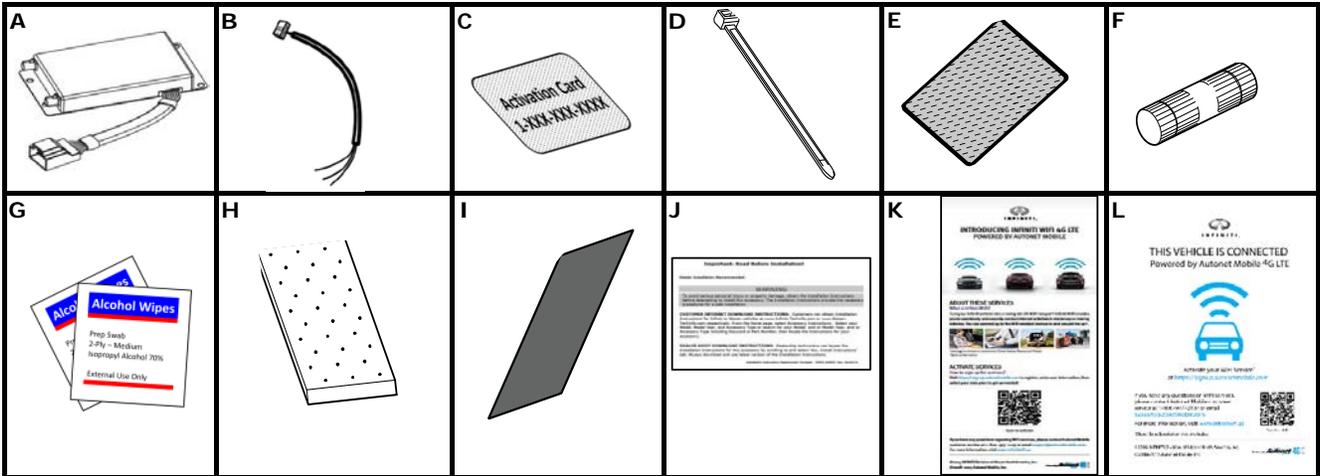

**PART NUMBER(S)** 999Q8 RZ000 (Wi-Fi Kit)  
999Q9 AY001/ T99F6 4RA0A (Accessory Service Connector) - **Not Included in the Kit above**

**KIT CONTENTS:**

Item	Qty.	Part Description	Service Part Number
A	1	Wi-Fi Router (TCU) Module Infinity	T98Q8 5DC0A
B	1	TCU Wire Harness, length 1100mm	T98Q8 4RA1A
C	1	Activation Card	
D	8	Cable Ties, 10 inch	
E	8	Single sided foam tape, (3.5x1x0.25") (LxWxH inches)	
F	3	Posi-tap connector	999M1 VT000
G	2	Alcohol Prep Pad	
H	1	Double sided foam tape, (140x70x2 mm) (LxWxH)	
I	5	Single sided clear PET tape, (4x1x0.01") (LxWxH inches),	
J	1	II Replacement Template	999V2 AW000
K	1	Glove Box Brochure	
L	1	Windshield Sticker	

**ITEMS NOT IN KIT THAT MAY BE REQUIRED:**

AA	1	Accessory Service Connector (NOT INCLUDED IN KIT) <b>SERVICE PART</b>	999Q9 AY001/ T99F6 4RA0A
----	---	---	--------------------------

AA

**Note:** 1 or 2 ASC/s (Accessory Service Connector/s) may already be installed in the vehicle.

**TOOLS REQUIRED:**

- Wire Cutter
- Nylon Trim Tool
- #2 Phillips Screwdriver
- Tape Measure
- 10mm Socket
- Ratchet
- Flashlight

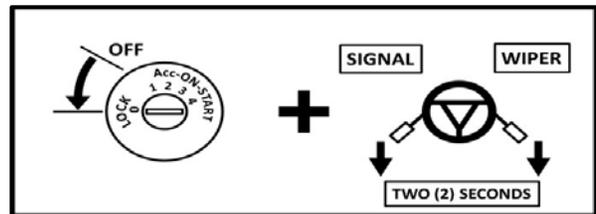

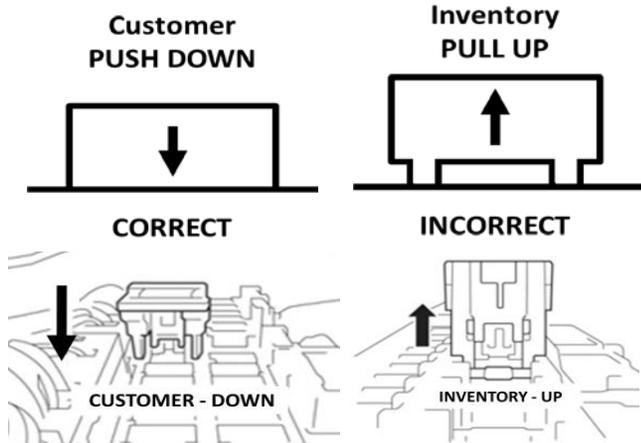

**Vehicle Preparation:**

**CAUTION**

• **Always confirm the ignition is in the "OFF" position before changing the switch condition.**

- 1) Apply parking brake
- 2) Confirm vehicle is not in the default shipping state or "Inventory position" as shown below. Failure to confirm vehicle has been removed from this state will result in loss of normal vehicle operation.
- 3) Locate Extended Storage Switch in cabin fuse block. Confirm it is in the "Customer" position. See below for reference.
  - a) To remove transit mode (Fuse Block):
    1. Remove fuse cover lid.
    2. Push down shorting pin.
    3. Ign On 2 times without starting the vehicle.
  - b) To remove transit mode (BCM):
    1. Confirm ignition switch is in "OFF" position.
    2. Simultaneously push the signal and wiper switch fully down for two (2) seconds.

**NOTE:** While in BCM Transit Mode, turn signal indicators will remain illuminated for one minute.

- c) To return to transit mode for storage:
  1. Ign Off.
  2. Remove fuse cover lid.
  3. Pull up shorting pin.
  4. Assemble fuse cover lid.
  5. Ign On 2 times without turn the vehicle on.
  6. Confirm transit mode condition on meter

**NOTE:** Typical vehicle condition shown above. Switch is easily identifiable by the permanent, push-pull fuse holder. Actual position on the fuse block may vary, vehicle to vehicle.

Condition	Switch Position	Note
Vehicle is delivered to the dealer	Inventory Condition	
Technician performs PDI	Customer Delivery	Return to Inventory position after PDI.
Customer test drives the vehicle	Customer Delivery	Return to Inventory position after test drive.
Vehicle is being stored at the dealer	Inventory Condition	
Vehicle is delivered to customer	Customer Delivery	

**NOTE:** The Extended Storage Switch is only an aid to improve battery life during vehicle storage at the dealer. If the Extended Storage Switch fuse ever needs service after vehicle delivery, discard the Extended Storage Switch and install the correct fuse in its place.

- 4) Turn ignition switch to "ON" position
- 5) Record the customer radio presets and other presets as required.

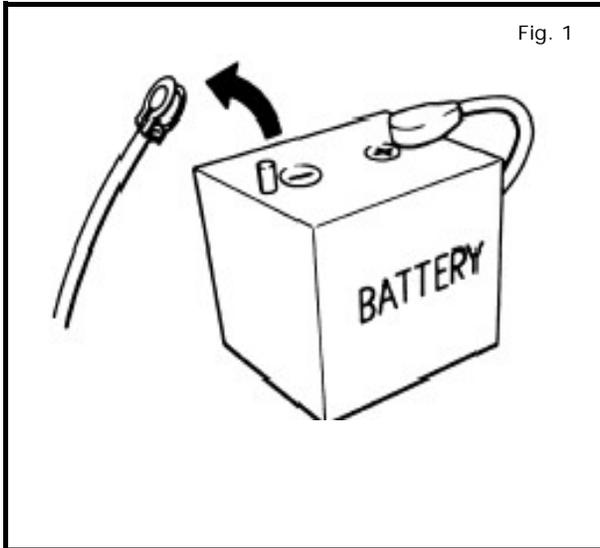

Preset	1	2	3	4	5	6		

- 6) Put shift lever in "P" position for A/T and CVT or "1st" for M/T
- 7) Turn ignition switch to "OFF" position
- 8) Use seat and floor protection.

INSTALLATION PROCEDURE: PRE-INSTALLATION CAUTIONS / NOTES

**CAUTION**

- Allow 3 min after key off and doors closed for vehicle to time out. Allow an additional 3 min after negative terminal dis-connect before separating any electrical connectors.

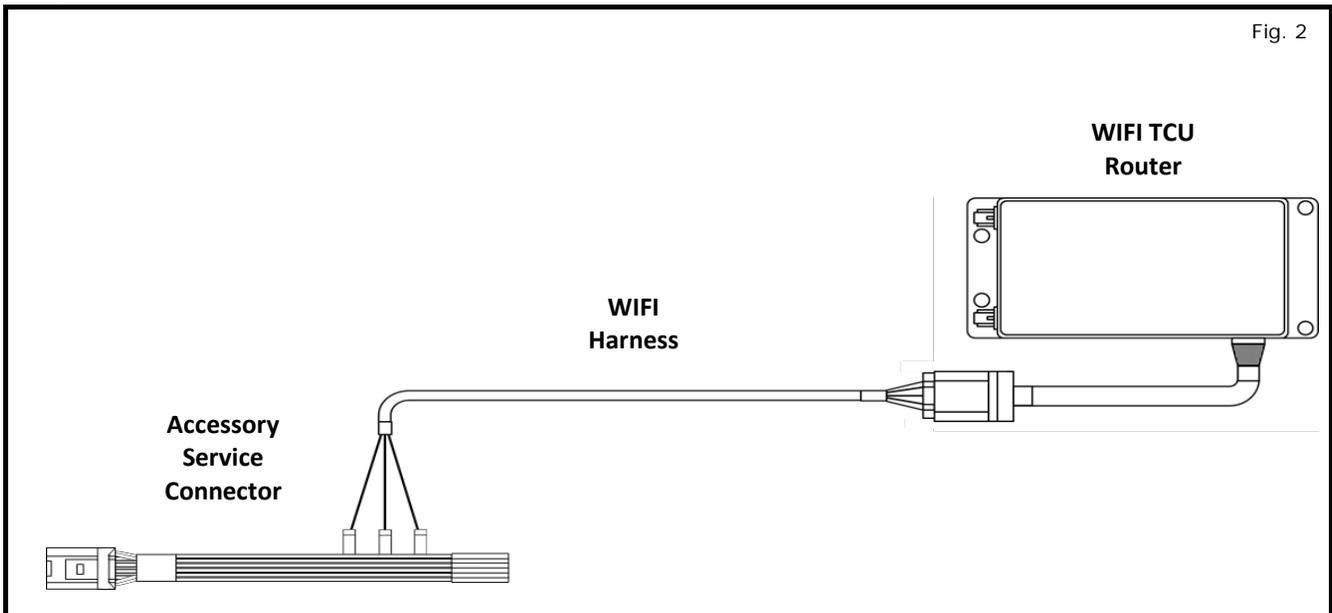

- 7) Disconnect the negative battery terminal as shown in Fig. 1.
- 8) Use seat and floor protection.
- 9) This part is to be installed at surface temperature of 65-100 deg.F.

**CAUTION**

- Take care not to scratch or damage any component during the removal or re-installation process.
- Trim pieces found to have witness marks or broken clips are not to be reinstalled.
- Additional items in cargo area may need to be removed.
- Always remove vehicle parts in the sequence they are shown, improper procedure can damage parts.
- Store removed parts in a safe and protected manner.

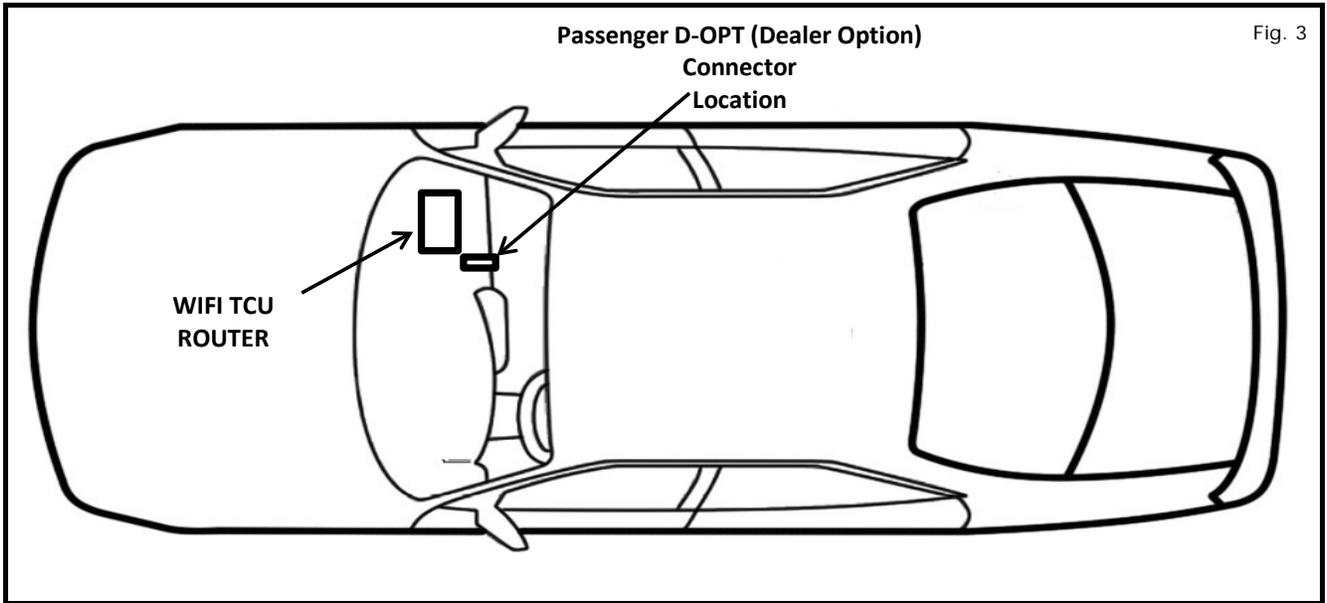

INSTALLATION OVERVIEW:

1.) SYSTEM

**INSTALLATION OVERVIEW:**

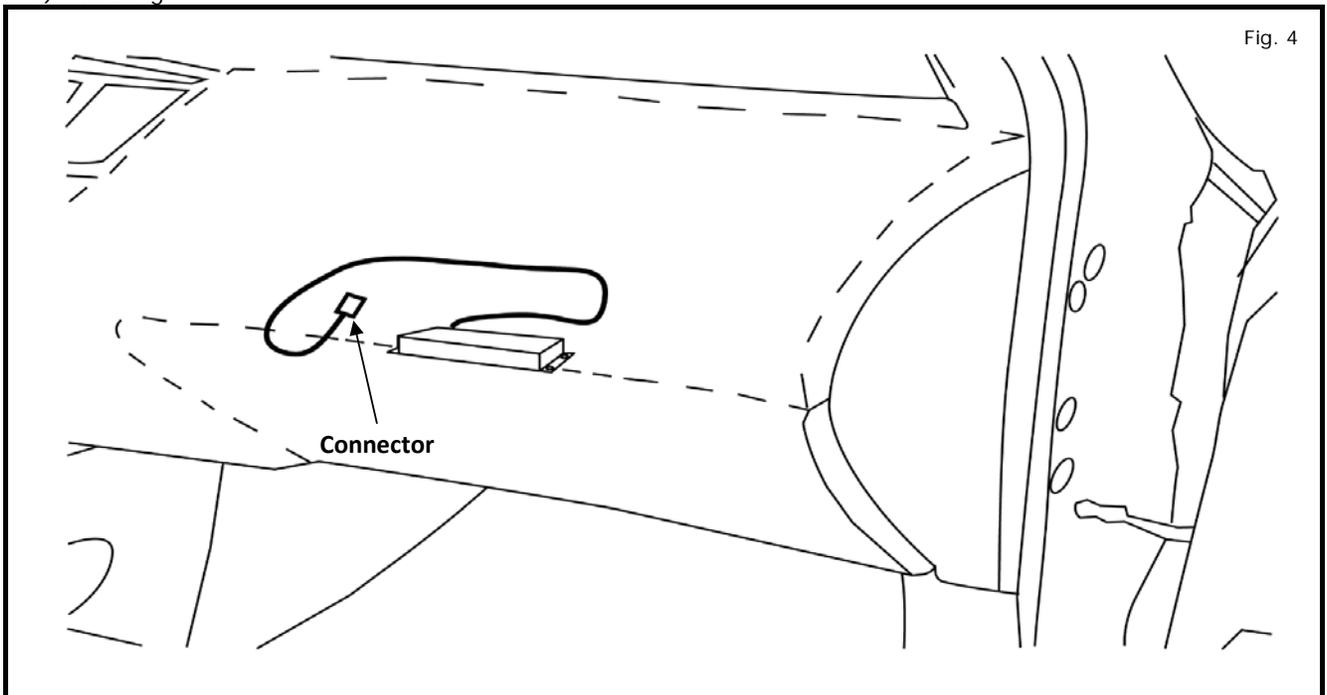

2.) VEHICLE

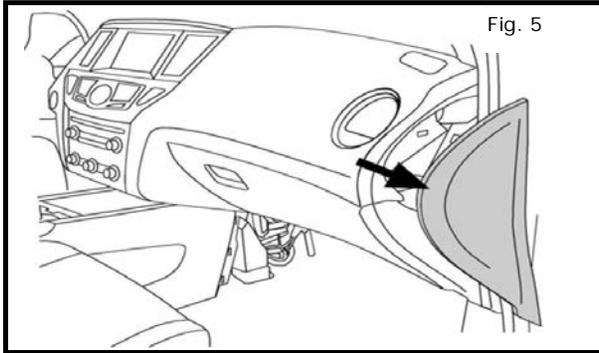

**⚠ CAUTION**

- Any description of vehicle wiring color is for reference only.
- Always refer to vehicle wiring diagram for details.

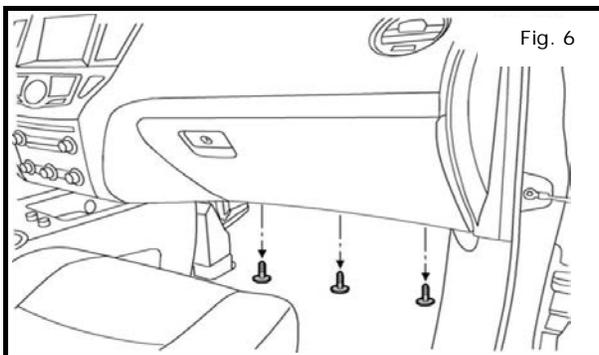

3) Routing

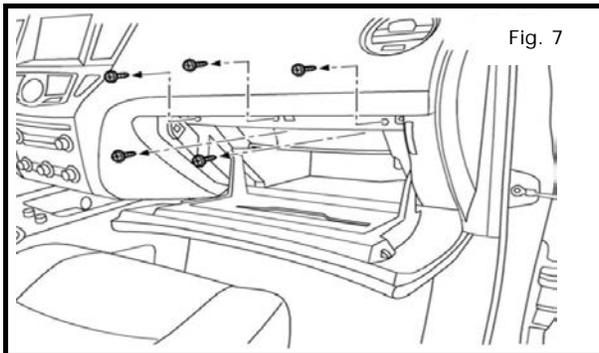

**INSTALLATION PROCEDURE: VEHICLE PARTS REMOVAL**

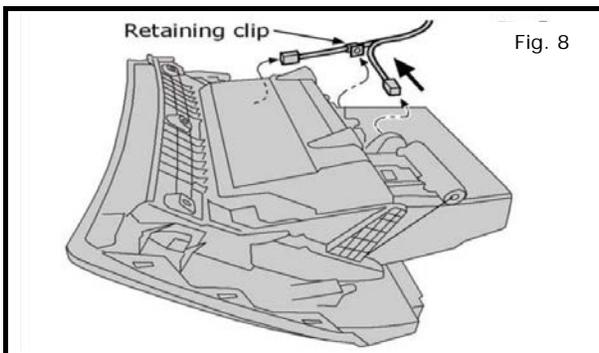

- 1) Removing dash mask.
  - a) Carefully pry off passenger side dash mask as shown in Fig. 5.

- 2) Removing glove box.
  - a) Remove three (3) phillips head screws from underside of glove box as shown in Fig. 6.

- 3) Removing glove box.
  - a) Open glove box door and remove five (5) phillips head screws from inside glove box compartment as shown in Fig. 7.

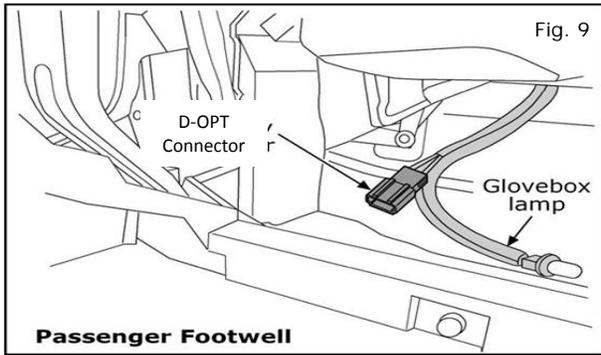

- 4) Removing glove box.
  - a) Carefully pull glove box assembly partially out, then gently detach clip and disconnect glove box lamp as shown in Fig. 8. Once fully removed, set glove box assembly aside.

**NOTE:**  
Place glove box on soft, clean surface to avoid damage.

**INSTALLATION PROCEDURE:**

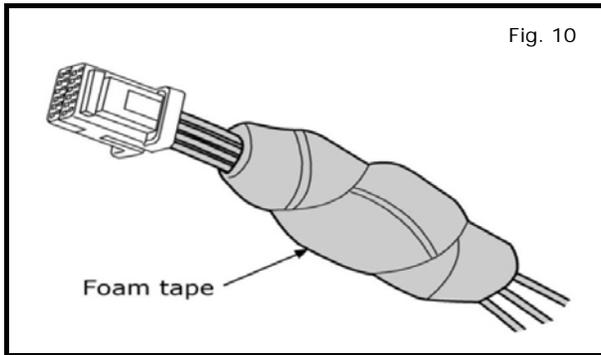

**VEHICLE PARTS REMOVAL**

- 5) Locating Passenger D-Opt Connector.
  - a) Locate the passenger side Accessory Connector plug. It will be located in the glovebox opening on the lamp harnesses shown in Fig. 9.

**NOTE:**

A previously installed accessory may be present. If so, carefully remove accessory connector harness from D-Opt connector before posi-tapping. It is recommended that all posi-tapping be completed before reattaching accessory connector harness to plug.

- 6) Locating Accessory Service Connector.
  - a) If there is already an Accessory Service Connector in passenger side remove it before continuing.
  - b) Remove any foam tape present before adding any positaps as shown in Fig. 10.

**Note:** If there is not an Accessory Service Connector present in the passenger side connector order from service dept.

Fig. 11

Pin	Label	Color
1	BAT	WHITE
2	N/A	N/A
3	ACC	PURPLE
4	N/A	N/A
5	BAT_SVR	PINK
6	FR_OR_SW	GREEN
7	THRU_SIGNAL_2	LT GREEN
8	THRU_SIGNAL_1	GREY
9	N/A	N/A
10	RM_LMP	LT BLUE
11	N/A	N/A
12	GND	BLACK

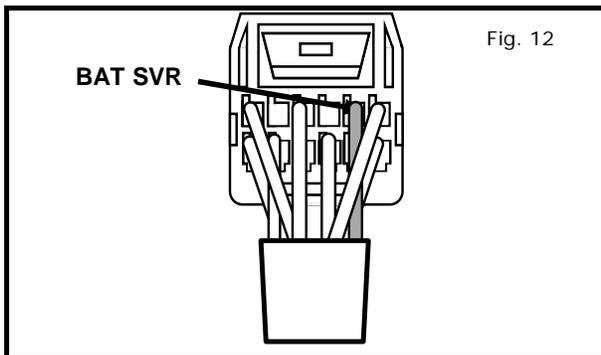

Pin location is referenced looking from the harness side of connector.

BAT\_SVR

- 7) Accessory Service Connector Reference.
  - a) Accessory Service Connector pin out is shown in Fig. 11.

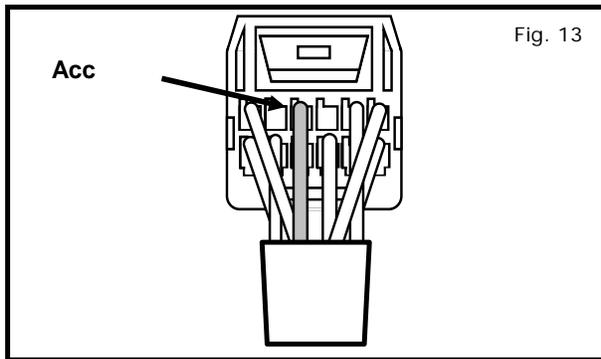

**Notes:**

- 1.) For direction on how to posi-tap refer to steps 11 - 21.
- 2.) For additional circuit information refer to the mech drawing at the end of the installation instructions.

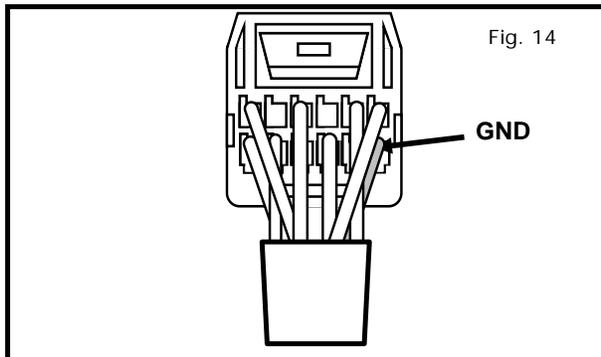

- 8) Posi-tap B+
  - a) Tap **Red** wire on WiFi TCU Module harness to the Pink (BAT\_SVR) wire on Accessory Service Connector as shown in Fig. 12.

## INSTALLATION PROCEDURE: POSI-TAP

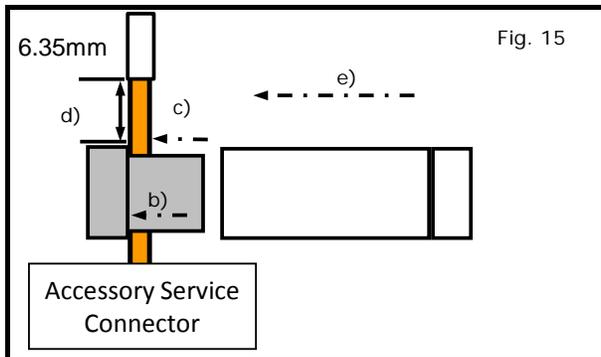

- 9) Posi-tap ACC
- Tap **White** wire on WiFi TCU module harness to **Purple** (Acc) wire on Accessory Service Connector as shown in Fig. 13.

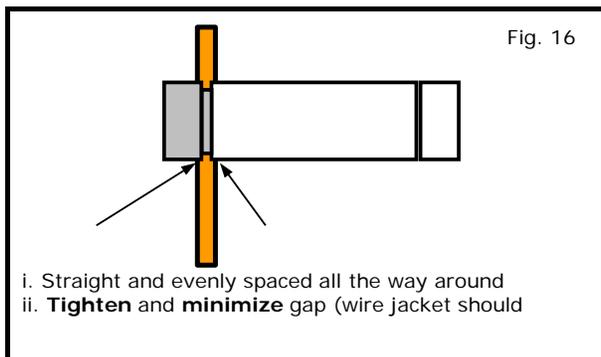

- 10) Posi-tap GND
- Tap **Black** wire on WiFi TCU Module harness to the Black (Gnd) wire on the Accessory Service Connector as shown in Fig. 14.

**NOTE:** Figures are not to scale.

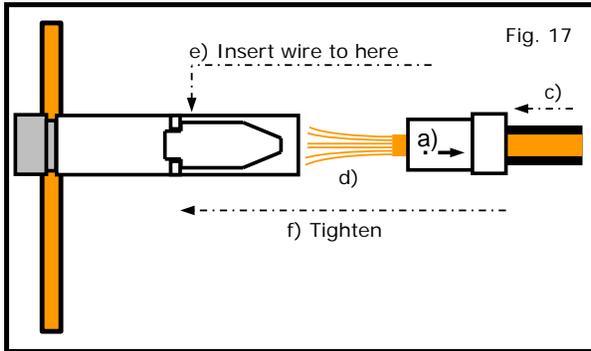

- 11) Posi-tapping an Accessory service wire (Fig. 15)
- Identify and confirm correct wire in Accessory Service Connector to be tapped.
  - Remove cap (slot side) from tap body.
  - Slide cap around single accessory wire.
  - Position cap  $\geq 6.35\text{mm}$  (0.25in) away from heat shrink end of Accessory Service Connector (measurement for first posi-tap installed on circuit).
  - Tighten tap **TIGHT** with finger pressure.
  - Tighten by another quarter turn.

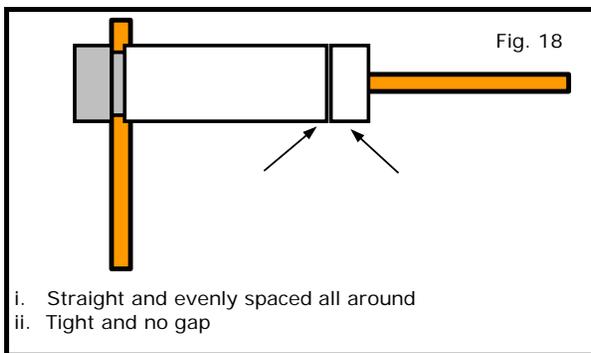

- 12) Inspecting tap for correct installation (Fig. 16).
- Pull on wire lightly to ensure connection.
  - Inspect tap to ensure correct installation.
  - Test signal to ensure that it is working properly.

**NOTE:** Avoid putting pressure on the vehicle wire and tap for the remainder of the installation.

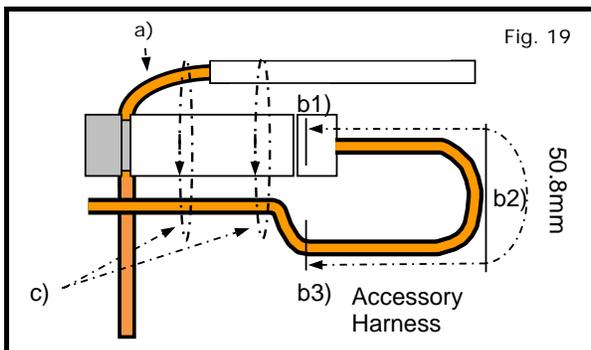

## INSTALLATION PROCEDURE: POSI-TAP

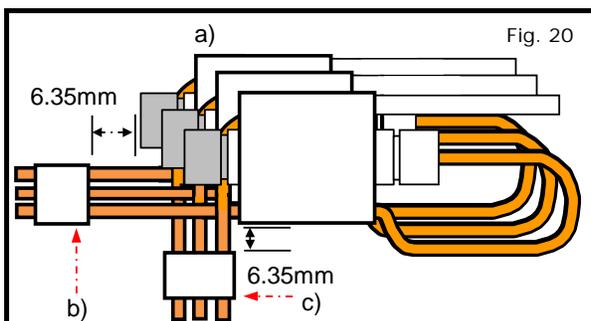

- 13) Tap accessory wire (Fig. 17).
  - a) Remove tap (non-pierce) side from tap.
  - b) Remove protective stub from wire.
  - c) Insert wire through non-pierce side opening.
  - d) Spread individual strands into fan shape.
  - e) Insert wire into the tap body and ensure that it is all the way in.
  - f) Tighten tap **TIGHT** with finger pressure.
  - g) Tighten by another quarter turn.

- 14) Confirm tapped accessory wire.
  - a) Pull on wire lightly to ensure connection.
  - b) Inspect tap to ensure correct installation as shown in Fig. 18.

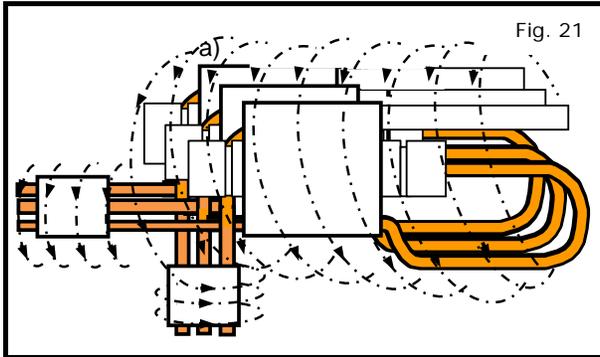

- 15) Forming strain relief loop - required (Fig. 19).
  - a) Gently bend end of pierced wire (where it exits cap) down towards body of posi-tap.
  - b) On tapped wire of the non-pierce side; starting at point b1), measure 50.8mm(2in) to point b3). Make first bend of loop b2), half distance measured 25.4mm(1in), and up toward body of the posi-tap, make second bend of loop b3).
  - c) Secure pierced wire on heat shrink side and tapped wire on non-pierce side to body of tap with electrical tape ( $\geq 2$  revolutions).

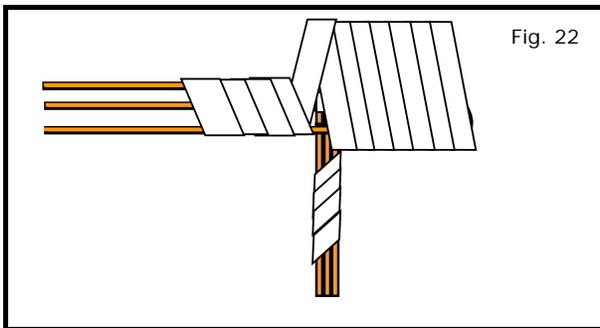

- 16) Securing multiple accessory taps (Fig. 20).
  - a) The tapped accessories (wires already secured to tap bodies) are stacked slightly staggered on top of each other as shown in Fig a).
  - b) Tapped wires on non-pierce side of all the posi-taps are secured to each other with electrical tape ( $\geq 2$  revolutions) at a distance of  $\geq 6.35\text{mm}$ (0.25in) as shown in Fig b).
  - c) Pierced wires of first and subsequent posi-taps are secured to each other with electrical tape ( $\geq 2$  revolutions) at a distance of  $\geq 6.35\text{mm}$ (0.25in) as shown in Fig c).

## INSTALLATION PROCEDURE: POSI-TAP

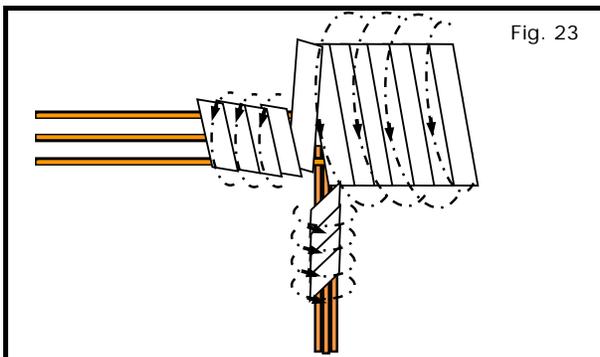

- 17) Pre- foam protective wrap
- a) Starting at heat shrink; firmly wrap posit-tap bundle with electrical tape, making sure to overlap previous revolution as shown in Fig. 21.

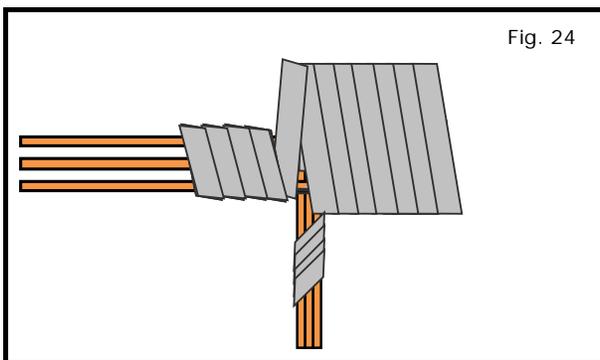

**Note:** If using a non adhesive tape to wrap the bundle, secure at both ends with  $\geq 2$  revolutions adhesive electrical tape.

- 18) Finished protective wrap
- a) Make sure finished wrap looks similar to Fig. 22.

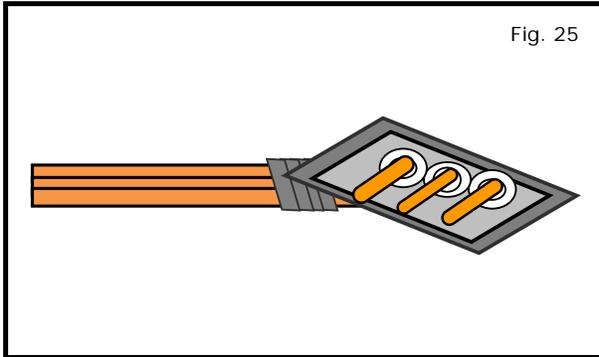

- 19) Foam wrap for posi-tap bundle (foam strips)
- a) Wrap posi-tap bundle with foam tape, following a pattern similar to electrical tape, making best use of foam strips provided as shown in Fig. 23.

- 20) Finished foam wrap for bundle (strips-top view)
- a) Make sure finished wrap looks similar to Fig. 24.

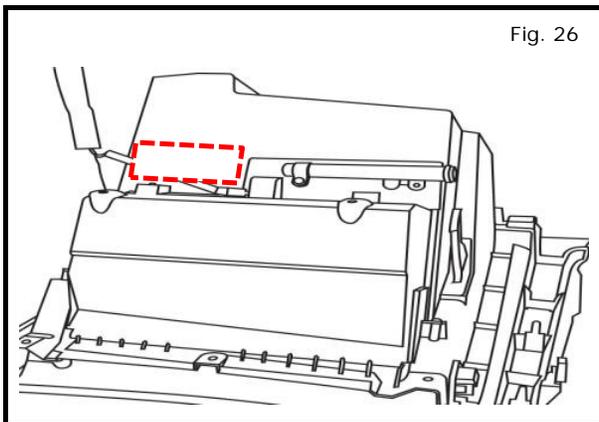

## INSTALLATION PROCEDURE: POSI-TAP

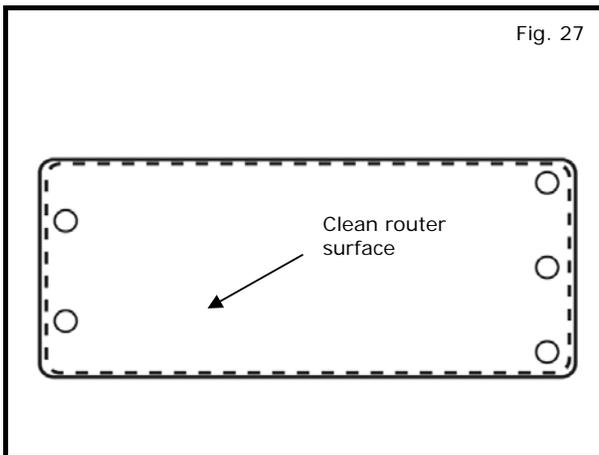

- 21) Finished foam wrap for bundle (strips-side view)
- a) Make sure finished wrap looks similar to what is shown in Fig. 25.

### CAUTION

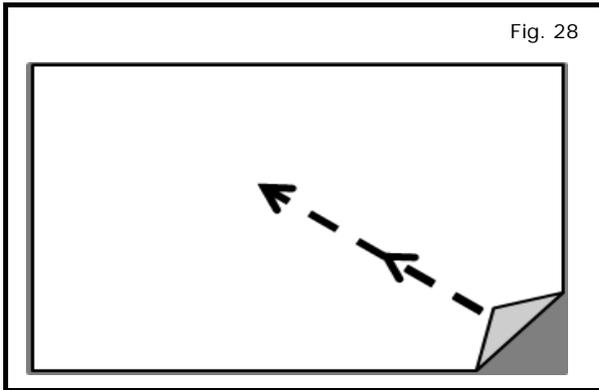

This Accessory Service Connector is for use only with Genuine Nissan (or Infiniti) or Nissan (or Infiniti) approved accessories. Use of this connector with non Genuine Nissan (or Infiniti) or Nissan (or Infiniti) approved accessories or failure to follow the installation instructions for the connector contained in this package may result in damage to the accessory and/or your vehicle. Nissan (or Infiniti) is not liable for loss or damage due to improper installation or the installation of non Genuine or non approved accessories.

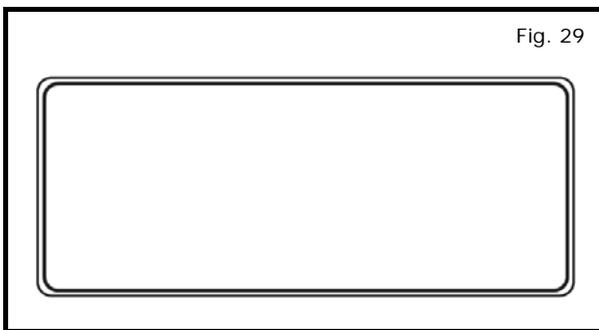

- 24) Prepping surface for mounting WiFi router.
- a) Clean glove box installation surface and WiFi base plate with an alcohol wipe. Figures 26 & 27

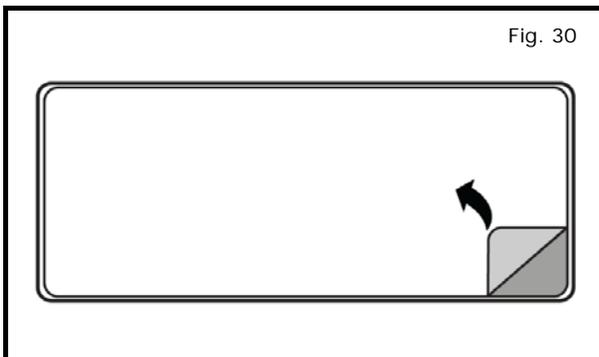

## INSTALLATION PROCEDURE: WIFI MODULE

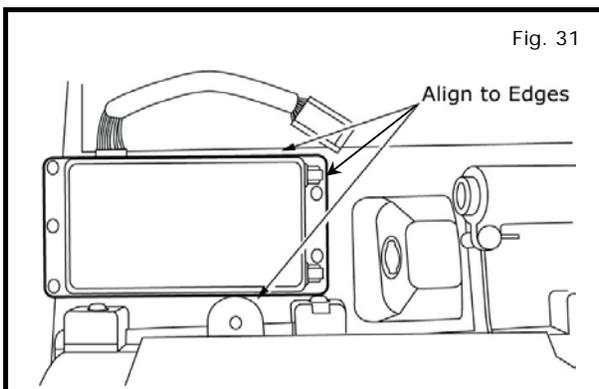

- 25) Router Installation
- Peel tape liner off adhesive square as shown in Fig. 28.

- 26) Router Installation
- Apply the double sided foam tape (140x70x6.4 mm) to the base plate of the Wi-Fi router as shown in Fig. 29.

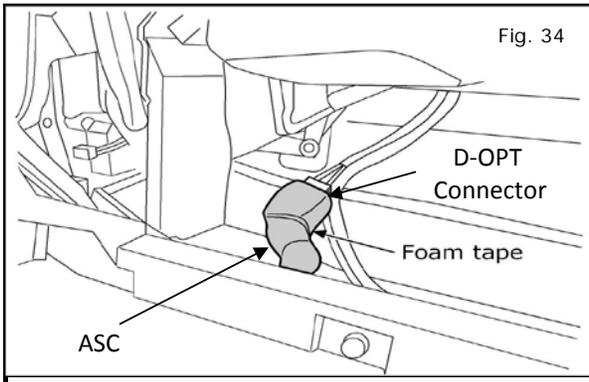

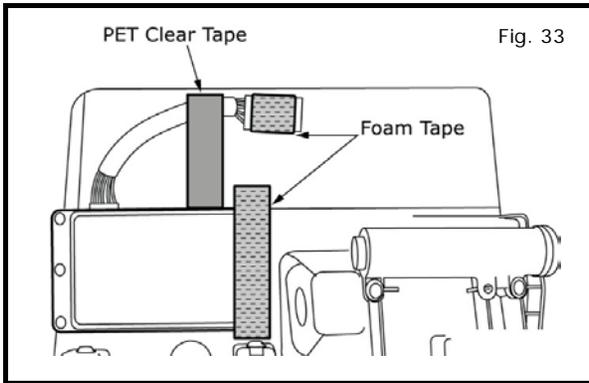

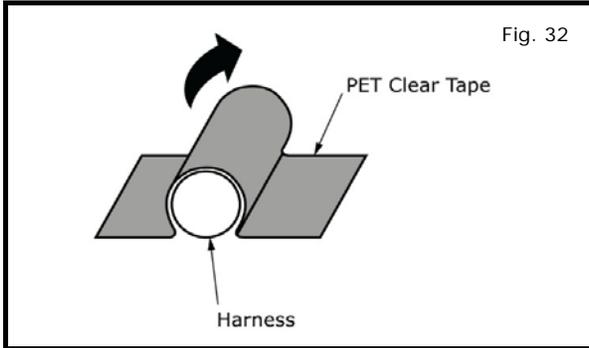

- 27) Router Installation
- Peel tape liner from foam pad on router as shown in Fig. 30.

- 28) Installing the Wi-Fi Router
- Align Wi-Fi router to edges of the glove box and to edge of insulation.  
**Press WiFi router to glove box with 15lbs min. pressure.** (Figure 31)

## INSTALLATION PROCEDURE: WIFI MODULE

### NOTE:

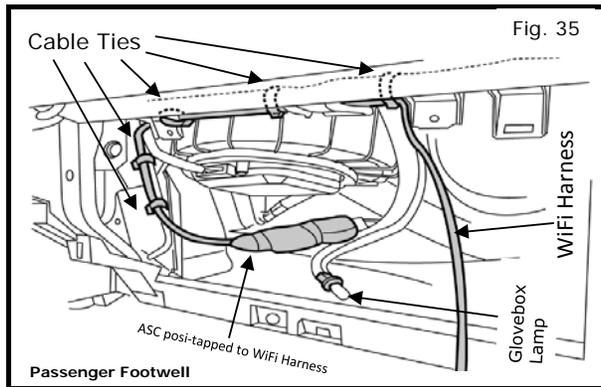

When taping PET clear tape to glove box, ensure it is wrapped up and over harness as shown in illustration.

- 29) Wrap male connector in foam tape and secure to top of glove box with PET clear tape as shown. Add Foam tape over antennas.

- 30) Plug the Accessory Service Connector (ASC) into D-OPT Connector plug on the Passenger side. Wrap the connectors in Foam tape to prevent rattle.

(Refer to Figure 9 & 10 on Page 6 for more information)

## INSTALLATION PROCEDURE: WIFI MODULE

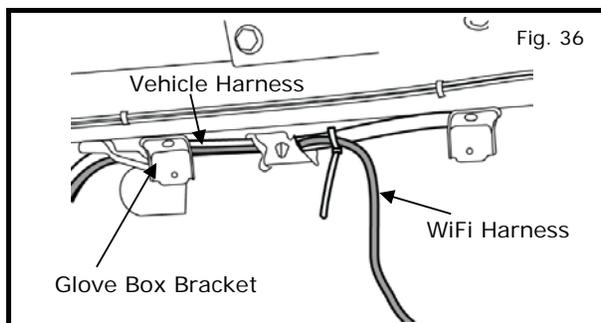

- 31) Router Installation
- Positap ASC to WiFi Harness & route WiFi harness up and behind metal brackets and run WiFi harness along the existing harness at the top of the glovebox cavity and out towards the A-pillar.
  - Secure with cable ties as shown.

**NOTE:**

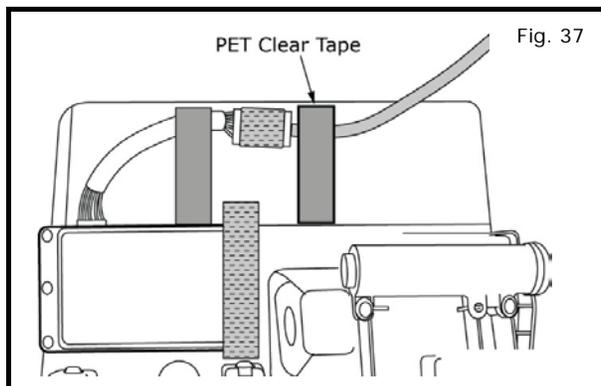

**Metal brackets are sharp.**

**Do NOT secure the wiring to the blower motor housing in any way.**

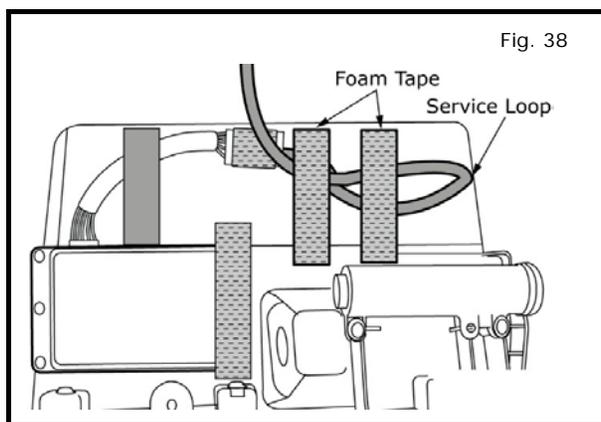

**DO NOT tighten Wire ties at this step**

- 32) Length of WiFi harness should be 600mm from last cable tie to start of WiFi harness connector. Measurement for Service Loop preparation in Step 34.

- 33) Plug WiFi harness connector to WiFi module connector and secure harness to glove box with PET tape as shown.

- 34) Service Loop
- Make service loop and tape to top of glove box as shown with 2 pieces of foam tape.
  - Tighten all Wire ties after this step

- 35) Final Inspection
- Proceed to final inspection page 15 and complete work sheet.
  - Go to sheet 16 and 17 and complete WiFi router test.

## INSTALLATION PROCEDURE: WIFI MODULE

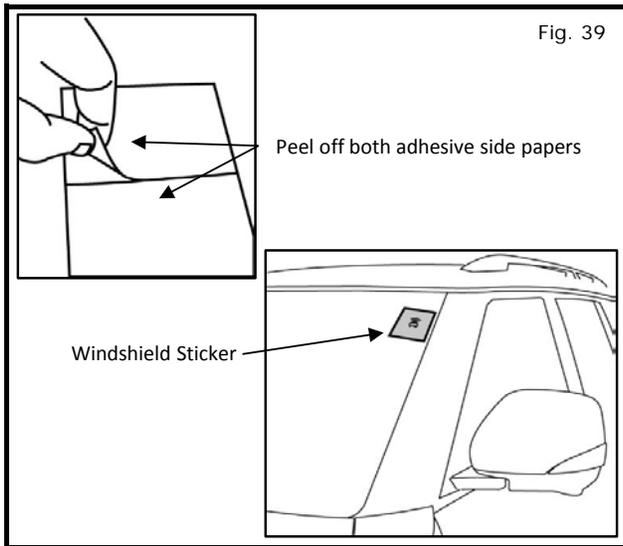

Fig. 39

### 36) Window Sticker Placement (Optional)

- a) Peel off adhesive side paper from sticker and place it on top left corner (Driver side front) of windshield from inside of vehicle with adhesive side facing outside, as shown in Fig. 39

37) **Reinstall** the glovebox lamp & assembly (see figs. 6-8).

38) **Reinstall** side dash mask on Passenger side of Vehicle (see fig. 5).

**FINAL INSPECTION:**

**⚠ CAUTION**

**Use caution when re-installing interior components to avoid damage, scratches, or breaking of mounting clips. Refer to the vehicle service manual for more information.**

- Inspect the installation area for any debris.
- Make sure all trim clips are in their retainers and gently press the trim panels into place.
- Verify re-installed trim parts for proper flush fit (no gap, no waviness, etc.).
- Verify all clips are fully engaged and locked.
- Verify re-installed trim parts are free from cracks, scratches or stress marks.
- Verify vehicle headliner, seat, steering wheel, center console, floor carpets, etc. are not soiled.
- Verify interior and exterior is not damaged.
- Connect the battery negative terminal and tighten the nut to 5.4 N-m (47.8 lb-in).
- Turn ignition switch to "OFF". Wait 10 seconds, then switch to "ON".
- Turn ignition switch to "ON" and confirm proper operation of vehicle systems and verify:
- Re-program radio presets and other vehicle settings to the recorded settings.
  - Note Accessory Service Connector in Passenger footwell.
  - Confirm proper audio function (AM, FM, SAT, CD and AUX).
  - That there are no new Diagnostic Trouble Codes.
  - Verify all windows and sunroof (if equipped), one touch operation and perform the reset procedure if necessary. Refer to the vehicle service manual for more details.
  - Power Back Door (If equipped). - Turn on the car, push and note if trunk opens.
  - Tail Lamp - Turn on headlamps; open glove box and note whether light goes on.
  - Start vehicle. Note whether vehicle starts.
- Front Sonar Module Connector - Turn on vehicle, put vehicle in 'Drive'. Move slowly towards a large object in front of the vehicle. Note whether alarm sounds.
- Rear Sonar Module Connector - Turn on vehicle, put vehicle in 'Reverse'. Move slowly towards a large object behind the vehicle. Note whether alarm sounds.
- Place the Owner Manual, Quick Reference Guide, and/or other Manual in the glove box.
- Place WiFi sticker to driver side front windshield (if required)

## FINAL INSPECTION: CHECK OUT

- Turn your car to the ACC position to power up the WiFi module. Wait 3 minutes.
- Open your wireless network list and connect to "Autonet-XXXX" (The last 4 digits will be the last 4 digits of the WiFi serial number).
- Open your browser the following screen appears.

Autonet assumes no responsibility for the configurations, security, or data files on your wireless device resulting from connection to Autonet's network. Anti-virus, privacy, and security protection is the responsibility of the user.

Autonet Mobile recommends that the driver of this vehicle should not attempt to use this system while driving the vehicle.

Do not operate any function that takes your attention away from safely driving your vehicle. Any function that requires prolonged attention should be performed after coming to a complete stop. Always stop the vehicle in a safe location before performing these functions. Failure to do so may result in an accident.

Copyright © 2008 - 2015 Autonet Mobile, Inc. All Rights Reserved.

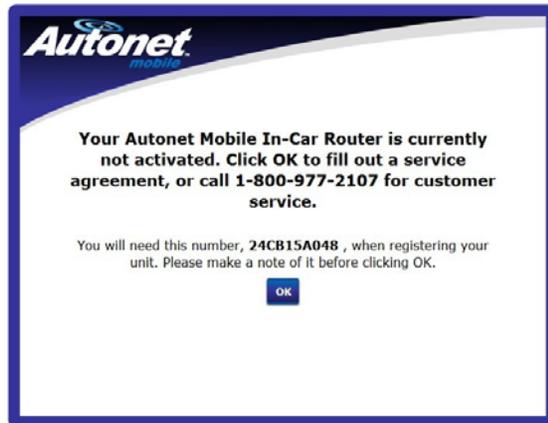

- Click the LOGIN button. If the following screen appears showing no signal while trying to log in there is insufficient cell tower signal. The vehicle may have to be moved outside for better reception.

If you are unable to see the "Autonet-XXXX" in your wireless network list verify power is present to the WiFi module. If power is present and module still does not appear on the wireless network or the Establishing Link still appears on the display, access the following troubleshooting link:  
[https://autonetmobile.com/nissan/AutonetTroubleshootingSteps\\_v1.0.1\\_08012017.pdf](https://autonetmobile.com/nissan/AutonetTroubleshootingSteps_v1.0.1_08012017.pdf)

**FINAL INSPECTION: CHECK OUT**

- After pressing the 'Login', the following window will open, the WiFi module is now in communication with the cell tower. Installation is complete.

The test verifies data communication via network/telecommunication as indicated by prompting the user to fill out a service agreement.

If the service agreement does not pop up this indicates that the Telecommunications (WiFi/network) failed. Contact Autonet Mobile at 1-800-977-2107

- Place the Activation Guide, and glove box brochure in the glove box.

## ⚠ CAUTION

This Accessory Service Connector is for use only with Genuine Nissan (or Infiniti) or Nissan (or Infiniti) approved accessories. Use of this connector with non Genuine Nissan (or Infiniti) or Nissan (or Infiniti) approved accessories or failure to follow the installation instructions for the connector contained in this package may result in damage to the accessory and/or your vehicle. Nissan (or Infiniti) is not liable for loss or damage due to improper installation or the installation of non Genuine or non approved accessories.
